

creating certainty

Capabilities Statement

As an IT staffing and placement services provider, we create certainty for clients and candidates across the Delaware Valley region and other markets we serve. Since our founding in 1993, we have been providing consultants and IT permanent placement services to Fortune 500, middle-market companies, and state government agencies who employ cutting edge— as well as legacy— technologies. Our consultants are locally based in the various markets we serve, offering you flexibility and speed to reach your goals through our strategic IT staffing services.

- » Clinical Statistics & Programming

Government Contracts

Work with departments and divisions within the State of DE and New Castle County

Case Study

Government IT Outsourcing

PSCI began accommodating tight government budgets by providing IT resources on a Statement of Work (SOW) basis in 2007—a new idea for this government organization at the time. Spanning eight departments, including direct support for major governmental offices, PSCI has worked closely with government staff to provide knowledge experts and IT resources that have enhanced initiatives, improved delivery of government services and acted as an enabler for State employees.
